Plastic folding buttstock ensures convenience on march, during transportation and landing operations. The weapon retains ability to fire with folded buttstock.

The forearm, magazine, buttstock, and pistol grip are made of high strength plastic and feature great durability to stress. Protective coatings ensure excellent corrosion resistance of metal parts.

The AK features a base to mount a 40-mm under-barrel grenade launcher or a knife-bayonet, and a side mounting rail for night and daylight sights.

Muzzle compensator provides for cyclic fire accuracy and further reduces muzzle climb and burst recoil. Company quality control system and all-round test programs make the AK the ultimate world standard in 5.56mm.

Police and Special Forces Tactical Weapon

Submachine gun Vityaz-SN

submachine gun «Vityaz-SN» is designed to engage manpower, including manpower protected with personal armor, and unarmored vehicles

LENGTH	mm
• unfolded buttstock	705
• folded buttstock	480
WEIGHT,	kg
• with empty magazine	2.9

Specifications	
Ammunition	9x19
Sighting range, m	200
Rate of fire, rds /min	700
Fire control	Safe, single shot, Full Auto
Barrel length, mm	237.5
Magazine capacity, rounds	30

9-mm. submachine gun «Vityaz-SN» is designed to engage manpower, including manpower protected with personal armor, and unarmored vehicles (passenger vehicles, trucks, etc).

The submachine gun is chambered for various 9x19 mm. ammunition. Automatics operates on free bolt recoil principle. Trigger mechanism makes it possible to deliver single-shot and full-auto fire. The gun is fed from a sector-type magazine.

For comfortable carrying and transportation the submachine gun is equipped with the buttstock folding to the receiver left.

The «Vityaz-SN» can be provided with two types of mounting rails for optical or collimator sights: a «Pikatinni» rail on the receiver top or a dove-tail side rail. On the base of the front iron sight and forearm there are attachment points for laser target designator, tractical flash or fore grip.

The submachine gun can be equipped with a detachable silencer.

The «Vityaz-SN» is completed with a fastening device that joins two magazines in one block to speed up charging.

GP 34 is a light weight, compact single shot underbarrel grenade launcher designed to engage exposed targets or targets located in trenches or reverse sides of slopes at a distance of 100-400meters.

The GP-34 fits 5,45, 5,56 and 7,62 mm assault rifles made by Kalashnikov, AKM, AKMS, AK74, AK74M, AK101, AK103 and AN94.

The sight makes it possible to launch grenades along a flat or curved trajectory. The GP-34 fire VOG-25 or VOG-25M fragmentation grenades, VOG-25P or VOG-25PM fragmentation bounding grenades and VOG-25 smoke grenades.

An unused round can be removed with an extractor.

If necessary the Assault Rifle can be fired with the GP-34 mounted.

The GP-34 underbarrel grenade launcher is an integral part of the armaments of a XXI century soldier
